**Repair. Restore. Get You Back on Course.**

# WHAT WILSON'S WAYPOINT DOES

Wilson's Waypoint Fiberglass handles fiberglass and composite work that needs real fabrication skill—not just cosmetic patching. These project photos show structural restoration, custom component fabrication, commercial vehicle fiberglass work and finish work.

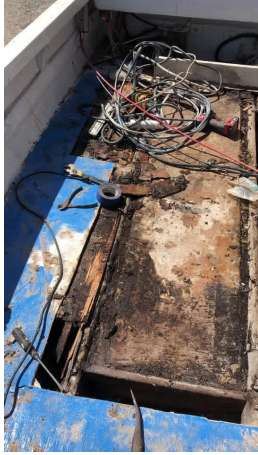

|                                     |                                                                                          |
|-------------------------------------|------------------------------------------------------------------------------------------|
| <b>MARINE</b>                       | Structural fiberglass repair • deck/core restoration • custom panels • interior rebuilds |
| <b>AVIATION / CUSTOM COMPOSITES</b> | Custom components • 3D-printed patterns/prototypes • fiberglass fabrication • fitting    |
| <b>COMMERCIAL TRUCKS / SEMIS</b>    | Fiberglass body repair • restoration • surface preparation • refinishing                 |
| <b>FINISHING</b>                    | Sanding • preparation • masking • primer/finish work • custom paint                      |

## WHY REFERRAL PARTNERS USE US

Body shops, marine businesses, mechanics, yards, specialty repair companies and other service providers can send fiberglass/composite work to a specialist instead of turning the customer away. The goal is simple: **help you keep the customer and keep the job moving.**

# CASE STUDY — MARINE STRUCTURAL RESTORATION

A major boat restoration showing the progression from deteriorated structure through fabrication, reinforcement, fiberglass layup and finished installation.

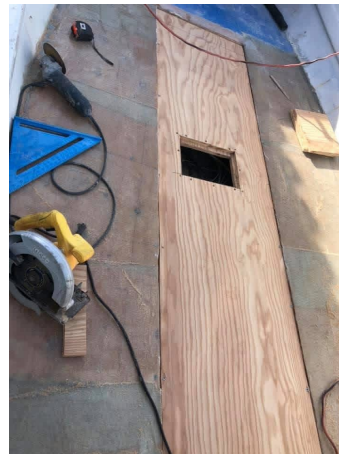

Starting point — deteriorated deck structure

Fabricating replacement sections

Rebuilding and laminating the structure

New structural panel fabrication

# MARINE RESTORATION — PROCESS & FINISH

Fiberglass layup and reinforcement

Finished fiberglass installation

Rebuilding damaged areas, fabricating replacement sections, reinforcing structure and integrating new fiberglass work into an existing boat.

# CASE STUDY — COMMERCIAL TRUCK / FIBERGLASS

Commercial vehicle fiberglass work combining repair, surface restoration and finish preparation.

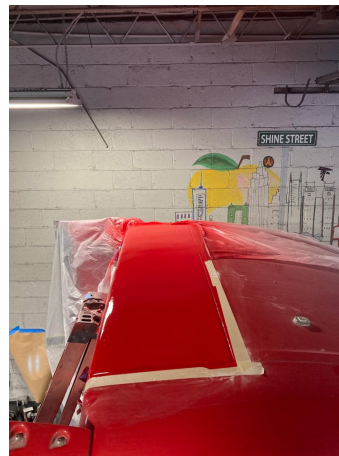

Commercial truck fiberglass body

Surface preparation

Custom fiberglass body work

Repair and finish preparation

# COMMERCIAL TRUCK — DETAIL & FINISH

Detailed fiberglass repair

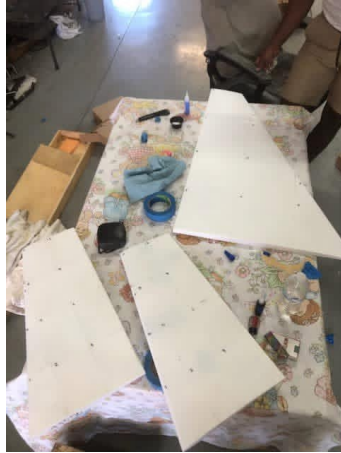

Finished repaired surface

A practical referral resource for body shops and fleet businesses when fiberglass work falls outside their normal workflow.

# CASE STUDY — CUSTOM HELICOPTER FABRICATION

Custom fiberglass/composite fabrication using 3D-printed and fabricated components for a custom helicopter project.

Custom component fabrication

Assembling fabricated sections

Fitting custom panels

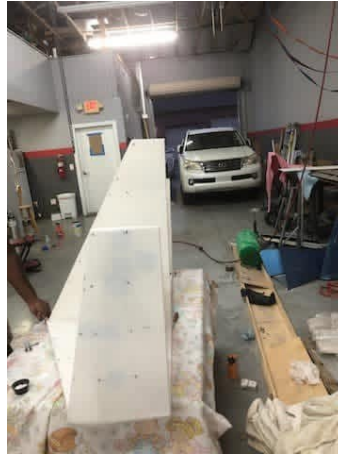

Fabricated components laid out for fit

# CUSTOM FABRICATION — FIT & ASSEMBLY

Custom upright/structural pieces

Fabrication work in progress

Custom pieces can be developed when a standard replacement is unavailable or when a project requires a one-off component.

# ADDITIONAL FABRICATION & REPAIR WORK

A broader selection of process and finished-work photography from the projects provided.

Interior structural work

Finished deck detail

Custom structural fabrication

Custom exterior/structural work

Fabrication detail

Custom panel/detail work

# THE REFERRAL PARTNER PROGRAM

Wilson's Waypoint is positioned to work alongside businesses—not compete with them.

| YOUR BUSINESS                               | WILSON'S WAYPOINT                          |
|---------------------------------------------|--------------------------------------------|
| Find the customer / diagnose the larger job | Handle the fiberglass or composite portion |
| Keep the customer relationship              | Repair, fabricate, restore and finish      |
| Refer work outside your specialty           | Return the project ready for the next step |

## IDEAL REFERRAL PARTNERS

Boat dealers • marine repair shops • boat yards • body shops • truck repair/fleet businesses • mechanics • specialty fabricators • aviation/specialty shops • businesses that encounter fiberglass damage but don't want to handle it in-house.
